Profile

I am a self-motivated Frontend developer who has gained hands-on experience of building web applications using technologies like HTML, CSS, JavaScript, React.js and Ruby on Rails. I am deeply dedicated to continuous learning, collaborating effectively and efficient problem solving. I am always eager to address complex challenges and embrace fresh opportunities in the ever-changing realm of software development and deliver value.

Skills

JavaScript

ReactJS

NextJS

Ruby on Rails

Java

Tailwind CSS

Professional Experience

June 2023 – November 2023
Kenya

Technical Mentor – Frontend Development Nairobi,
Everest Tech Hub Academy

- Regularly assessed progress and provided feedback to promote continued development, resulting in an improvement in student project completion rates.
- Mentored students in Git usage, resulting in a reduction in version control errors during project submissions.

- Mentored students in front-end development, increasing student proficiency in HTML, CSS, JavaScript, React, Tailwind CSS, and Bootstrap CSS.
- Taught students how to deploy their web applications, leading to an increase in successful project deployments. Assisted students who faced blockers while working on projects and provided guidance on writing clean and maintainable code.

Projects

Individual Project: Cocktail Finder

- I designed and developed a web application for discovering cocktail recipes.
- I developed it using HTML5, CSS3 and JavaScript.
- I implemented search functionality allowing users to find cocktail recipes based on ingredients.
- I also created an engaging, responsive user interface.
- I deployed the application on Vercel.
- Visit the site **Cocktail Finder**.

Group Project: Petify

- I developed a web application for people who would like to adopt pets using modern frontend technologies using React.js and Tailwind CSS.
- I collaborated with a team to create a user interface with seamless navigation and an engaging.
 - user experience.
- I used Pet Finder public API where all the data about the animals is fetched from.
- I deployed the application on Netlify ensuring browser compatibility and optimal performance.
- Visit the site **Petify**.

Individual Project: BravTech

- I developed a web application for bravtech a phone and laptop repair company based in Nairobi.
 - I worked on the user Interface design to come up with an interactive and seamless user experience.
 - I used HTML, CSS and JavaScript to work on that web app .
 - I deployed the application on vercel ensuring browser compatibility and optimal performance.
 - Visit the site [bravtech](#)
-

Education
